

Scientific Results

Of course we c-base staff have deducted our activities from very old and future bound wisdom crashers. Imagine that a natural hierarchy of IFOs does place us at point 4.21 of a mindcracking variety. Watch this non-detailed overview for a first impression, there are IFOs where you can lease your potentially extended and expanded **pan-existencies**:

1. within black holes
2. within suns, of matter as well as antimatter and itna

(itna is a more basic "anti" of common "matter + antimatter" and has the opposite gravity. An UFO built exactly of 50% itna has per definition weight zero, inertia zero, and that allows quite fast movements)

3. Artificial planets and moons
4. Natural planets and moons
 - 4.1 Out of plasma
 - 4.2 Gaseous
 - 4.3 Liquid
 - 4.4 Solid
 - 4.41 Solid with some liquid and/or gaseous parts
 - 4.411 right at gravity centre of planet or moon
 - 4.412 In between centre and surface
 - 4.413 Right at the surface or close to it
 - 4.4135 Same with "living beings" on surface, a coupling of common spiritual beings with partly self-feeling bio-robotical units, including a bunch of self focusing, while easily defocusing self-steering circuits ...

And so on, up to

- 4.23 lowest energy and structure, almost entropy deceased, frozen galaxies below 10 to the -40 degree Kelvin
- 4.24 Literally non material worlds
- 4.25 Intentionally non material worlds
- 4.26 Unimpinging and unimpingeable world
- 4.27 Unworldly structures
- 4.28 Unstructuredly existencies (virtually unexisting)
- 4.29 Unexistingly virtuals

and so on > 4.30 to 4.55

Take it easy. You are here to stay. Join on in. Jump on the band waggon. Dwell in existing, even being, culturing.

For wholegrain bits of truth revealed ... (sorry, secret).
